EDUCATION

2021 – present	**M.Sc** Financial Economics NORWEGIAN UNIV. OF SCIENCE AND TECHNOLOGY

Currently enrolled in a master's degree in financial economics. My fields of interest include quantitative finance, derivatives and especially machine learning applications in finance.

2017 – 2020	**B.Sc** Business Administration BI NORWEGIAN BUSINESS SCHOOL

Specialized in Advanced Managerial Accounting and Real Investment Theory, with Mathematical Analysis and Microeconomic Analysis as electives. Bachelor thesis was written in collaboration with Trondheim Havn, attempting to establish a fairer pricing model for incoming vessels.

WORK EXPERIENCE

aug 2018 – jun 2020 — Student Assistant

Student Assistant in the Student Service Centre. The work consisted mostly of handling inquiries (e.g. exam information, booking, tech issues) from students and employees by phone, e-mail or in person, but also facilitating other events on campus (e.g. guest lectures, meetings).

aug 2018 – dec 2018 — Learning Assistant

Learning Assistant in the course "JUR3420 Business Law". The work consisted of preparing and running seminars throughout the semester, as well as assisting students on an ad-hoc basis.

aug 2016 – jul 2017 — Store Clerk

Store Clerk at Kiwi Trysilvegen. Handling incoming deliveries, managing the point-of-sale and general day-to-day tasks. Had responsibility for opening and closing the store.

EXTRACURRICULAR ACTIVITIES

2021 — Reference group

Part of the reference group in the courses TIØ4145 Corporate Finance and IF400 Financial Derivatives at NTNU. Our responsibility was to act as a link between students and professors/faculty in questions regarding the course, as well as conducting surveys concerning quality assurance.

2019 — Ungt Entreprenørskap

Jury member at Ungt Entreprenørskap's regional exhibition. This is an arena for high school students with an entrepreneurial spirit to present their innovations to users, but also to attract potential investors and win prizes.

2018 — BI National Case Competition

Qualified to represent Trondheim in the annual national case competition, hosted in Bergen. The competition consisted of two separate cases provided by tech start-up Goodify and Jotun respectively. Our team won the 24-hour case provided by Goodify. Helped recruit new students interested in case solving the following year.

SKILLS

Technical

Proficient in statistical software like Stata, SPSS and R. General knowledge of Python with the pandas/numPy/matplotlib libraries. Efficient user of markup languages like LaTeX. Currently learning Swift/SwiftUI.

Other

Native Norwegian speaker, full English working proficiency.
